## AROUND the TOWNSHIP

### \$1,500 IN PRIZES WILL BE GIVEN AWAY

Just when you may be needing it most, the Township Register offers any resident of the township an opportunity to earn a handsome prize or commission money.

In a full page announcement on the back page, we are telling everyone just how it can be done.

If it is impossible for you to personally enter the campaign, you can nominate some one else. The big idea is to get started early before all of your friends and prospects have been canvassed by a rival contestant.

The Register's big circulation campaign offers you the chance to put your spare time to good use. You cannot fail to profit by your efforts in this contest. Read about it. Then, send in your name or the name of a friend right at the start.

Glowing reports are filtering back from Sacramento's state show this week concerning the interest being shown in Washington Township products on display there.

Included in exhibits competing for honors are wines from Irvington, Mission San Jose and Centerville; salt crystals and refined salt from Newark and Alvarado, and, of course, the famous flowers from township gardens and nurseries for which Alameda County enjoys a just renown.

Sunny California, even its most loyal supporters admit, does not always live up to its name. We have known the darkness of stormy skies and the thunder of flood waters. But at least we can take heart. One of those merciless debunkers has just brought in a report that in all but two states of the proverbially "sunny South" persons have frozen to death!

A farmer near Newark asserts that on Thursday of last week he shoed off a flock of ducks that were busily eating his barley. He estimated there were about 6,000 ducks in the bunch.

A sight such as this should be a fairly accurate sign of something.

### ADMISSION DAY

California is 89 years young this week!  
With four-score and nine shining candles on her birthday  
cake, California honors her birth as a state of the Union on  
September 9.

The adventurous road California has traveled since 1850  
provides a story of epic proportions. Gold, it is said, made  
California, and the aura of those pioneer days still hovers over  
its name. Gold from the earth and rivers is still a source of  
riches to be reckoned with, but in the black gold of her oil re-  
sources and in the green gold of her agricultural lands, the  
state has broadened the domain of her empire far beyond the  
dreams of the early Mission padres and the first settlers.

From the pastoral age of a century ago when this territory  
was an isolated outpost on the Western frontier, California has  
grown to be one of the most productive and wealthiest of states.  
It took men of courage and vision to make it so. Being still  
rich in vast resources, with that same courage and vision Cali-  
fornia can look confidently toward the future. A state only 89  
years young has only begun to make history.

### ADULTS GO TO SCHOOL

Are we falling down on the job of equipping ourselves with  
the means of becoming successful breadwinners?

Startling, indeed, is the report of California's Department  
of Education last week, citing the dearth of skilled workers in  
this state. Its current survey found some 110,000 jobs in need  
of competently trained workmen. And it found, which is more  
significant, some 110,000 Californians, many of them desperately  
in need of employment, who completely lacked the training to  
fill the bill.

But, happily, Californians seem rapidly to be growing  
aware of this serious shortcoming. Registration in vocational  
and evening high schools in many parts of the state is reaching  
a new high this fall, as adults of all ages signify their deter-  
mination to gain, through commercial and technical training  
courses, sure weapons for fighting the spectre of unemploy-  
ment.

Education has rightly been called the foundation of de-  
mocracy. It can never profit California to weaken or undermine  
that foundation!

PLAN IT  
THIS WAY**

## ADEQUATE WIRING for ELECTRILIVING

Here is a practical common sense way to make sure of good  
wiring in your home. Plan your convenience outlets where  
they will fit in best with your furniture. Are there enough  
outlets to serve the lamps, clocks, radios and other electrical  
appliances we all use in this day of ELECTRILIVING?

Are these outlets in the right places so that you will not  
have to run long cords along walls? Planning house wiring  
according to furniture arrangement in each room is the  
practical way to get a good wiring job.

Trying to get light and  
operate a washer and  
iron from a light socket  
cheats you by causing  
voltage drop.

Light is dimmer and toaster  
slower if you do this in your  
kitchen. This double plug  
ugly is a robber.

Down goes electric pres-  
sure when a three-way  
plug is used. Causes  
lights to go dim or  
blink.

Avoid the make-shift of double and triple plugs in the home  
you are building or remodeling. Give your electrical con-  
tractor an honest chance to do a complete and adequate  
wiring job. Remember a low price on a wiring job like a  
low price on most anything is not always the best bargain.
